

# 2009 Décor Trends

Trends may come and trends may go, but let's face it: tossing the latest color, fabric, pattern or material into your decor feels good. So for the sake of satisfying your desire, we will show you few interesting stylish ideas.

This summer décor trends are very much diversified, from the plain slick ultra modern with natural wood color style to the retro 60's style. The retro style is very attractive with its bold colours, strong graphics and contemporary furnishings.

If you are interested in spicing up your living room or outdoor furniture, look-out for lighting unites and chairs from this period.

Vibrant rain-bow colors are the highlight of the season; turquoise blue, strong yellow, Hermes orange, saga green, hot pink, and purple with all its shads. With a plain sofa- prefer-

able white- these colors can be used to brighten up the room.

In the living room you can use colorful pillows, throws, wall art, carpets, or even a fruit basket. For the bedroom, there is nothing more attractive then bedding sets.

Finally, don't be afraid to integrate different styles and trends in the same space. This look involves integrating furniture, fabrics, lighting, and artifacts from different cultures in a clean and modern way by combining them with classic pieces.

## Automatic Toilet Seat Cover

The automatic toilet seat covers. 'Unexpected intelligence' sums up the whole idea. It is a simple yet effective concept. A built-in sensor keeps the toilet cover open when a user is present, and will gently close the cover when the user leaves the area. It doesn't slam- it's equipped with a soft close feature that will lower the seats automatically as you wash your hands. This eliminates two problems at the same time air-borne germs from the toilet, and the age-old question of whether the toilet set should be left up or down!
